

22 April 1983

MEMORANDUM FOR: Chief, Facilities Management Division, OL

FROM:

Acting Chief, New Building Project Office, OL

SUBJECT: Tree Replacement

1. The Bid Package 4 (BP 4) landscaping contractor has identified and removed 29 dead pine trees that were planted under that contract. These trees were located in or around the GSA nursery. We are requesting, per Facilities Management Division (FMD) direction, that GSA replace these pines in kind at the same locations.

2. As for the trees provided by BP1 that have died in the pathway of the new sanitary line, we will have surplus BP 4 deciduous trees planted to replace these trees within the month of May.

3. We are also advising GSA not to install trees at the island with the oil vents in West III parking lot. These four trees along with approximately 50 others will remain as surplus until further direction by the Agency. These are in addition to those trees and shrubs from BP 4 that have not lived past the one year warranty. This office will continue to advise GSA of surplus tree placements, in the lieu of other specific FMD requests.
